Phase 1 — Empathy Map Canvas

Source-grounded standalone document

Empathy Map Canvas

Primary persona: Priya, a customer support operations manager who handles large backlogs of repetitive user inquiries.

Dimension	Persona Context
Thinks	Needs faster organization of entries, classification of topics, precise summaries, and better search visibility.
Feels	Overloaded by repetitive inquiries and manual documentation work.
Says	Needs quicker query resolution, organized FAQ content, and improved visibility into question trends.
Does	Handles repetitive inquiries, organizes entries, classifies topics, drafts support answers, and tracks trends.
Pains	Documentation maintenance, manual drafting, limited search-match visibility, and permission concerns.
Gains	Centralized FAQ workflow, AI-assisted drafting, structured categories, searchable content, validation, and access controls.

The Gains are mapped directly from the documented solution and key features rather than introducing new product capabilities.
