Phase 5 — User Acceptance Testing

Source-grounded standalone document

UAT Test Cases

The following cases are derived from the documented endpoints, role rules and user flows. They define acceptance criteria; they are not recorded test results.

TC	Action	Expected Result	Pass/Fail Criteria
UAT-01	POST /api/auth/register with valid data.	User profile is accepted/created.	PASS if valid registration succeeds.
UAT-02	POST /api/auth/login with registered credentials.	Authentication is successful and token/session is available for protected use.	PASS if valid credentials authenticate.
UAT-03	POST /api/faqs with Bearer JWT.	FAQ is created for authenticated creator.	PASS if FAQ persists with creator reference.
UAT-04	POST /api/faqs without valid JWT.	Protected access is denied.	PASS if request is blocked.
UAT-05	GET /api/faqs/search?q=configure.	Matching FAQ content is returned.	PASS if matching records are returned.
UAT-06	POST /api/ai/generate-faq with valid JWT and topic.	AI-generated FAQ content is returned.	PASS if AI workflow produces content.
UAT-07	POST /api/ai/generate-faq without valid JWT.	Protected AI access is denied.	PASS if request is blocked.
UAT-08	Creator edits/deletes owned FAQ.	Owned record can be maintained.	PASS if permitted ownership action succeeds.
UAT-09	User attempts to modify another user's FAQ.	Unauthorized modification is prevented.	PASS if request is denied.
UAT-10	Public user attempts protected API operation.	Protected endpoint is inaccessible.	PASS if access is denied.
UAT-11	Submit FAQ missing required fields.	Mongoose validation rejects persistence.	PASS if invalid record is not stored.
UAT-12	Admin performs documented user/FAQ/category management.	Admin functionality is available according to role.	PASS if documented admin permission works.

Acceptance Summary

Authentication, password security, FAQ lifecycle, search, AI generation, categories, schema validation, centralized errors and API verification should all be validated before acceptance. Actual Pass/Fail status remains TBD until execution evidence is available.
